

**Branch Log Sheet**

COMP 3350 - Wealth Wise App Project

Date: 2025-03-12

Team members: Alanna Morris, Max Waldner, Junior de Leon, Prit Italiya, Mahas Mohamed Mifthah

**Type:** Feature**Purpose:** Adds new features or functionality to enhance the app's capabilities. Relate to user stories.

Full Branch Name	Type	Number	Task Name	Description	Iteration	Contributor
Example: Feature#001_LoginFunction	Feature	001	LoginFunction	Implement user login function.	1	Team
Feature#001_AccountMgmt	Feature	001	AccountMgmt	Implementing account management feature and app launch. Parent branch.	1	Team
Feature#002_IncomeTracker	Feature	002	IncomeTracker	Users will be able to log income, view activity, add/delete an activity.	2	Team
Feature#003_ExpenseTracker	Feature	003	ExpenseTracker	Users will be able to log expense, view activity, add/delete an activity.	2	Team
Feature#004_AccountEditing	Feature	004	AccountEditing	Allowing users to make changes to their personal information	2	Team
Feature#005_SavingsTracker	Feature	005	SavingsTracker	Users will be able to log savings, view activity, add/delete an activity.	3	Team

Date: 2025-03-12

Team members: Alanna Morris, Max Waldner, Junior de Leon, Prit Italiya, Mahas Mohamed Mifthah

COMP 3350 - Wealth Wise App Project

Type: Development

Purpose: Internal development tasks like refactoring, addressing technical debt, or optimizing code.

Example:

Full Branch Name	Type	Number	Task Name	Description	Time (hr)	Contributor
Dev#000_LogSavings	Dev	000	LogSavings	Implements functionality to track savings for financial reporting.	2	Alanna
Dev#001_LoginPage	Dev	001	Login Page	Implements create account, signup, forgot password.	Prit	
Dev#002_EditDSOs	Dev	002	EditDSOs	Building DSO's	2	Alanna
Dev#003_SignUp	Dev	003	SignUpActivity	creating the ui for signup activity	0.5	Alanna
Dev#004_Login	Dev	004	Login Page	creating the ui for login activity	0.5	Alanna
Dev#005_navbar	Dev	005	navbar	Setting base header and footer navigation bars	Prit	
Dev#006_UpdateLaunchUI	Dev	006	UpdateLaunchUI	Updating app launch UI Pages	0.5	Alanna
Dev#007_FooterFragments	Dev	007	FooterFragments	Created placeholders of each dashboard for footer navigations	Prit	
Dev#008_storeUserData	Dev	008	storeUserData	have added functionality to add userdata and store even after closing the app	Max	
Dev#009_LoginLogic	Dev	009	LoginLogic	Have added logic for login, if user has previously created account can login	Max	
Dev#010_UpdateLoginUI	Dev	010	UpdateLoginUI	Reformatted the UI for this page	1	Alanna
Dev#011_UpdateSignUpUI	Dev	011	UpdateSignUpUI	Reformatted the UI for this page	1	Alanna
Dev#012_OTIncomeStub	Dev	012	OTIncomeStub	Creating the OneTimeIncomePersistenceStub file	Junior	
Dev#013_MainActivityUpdate	Dev	013	MainActivityUpdate	Updating the main activity file and moving the user service logic to its own file.	5	Alanna
Dev#014_ReExpenseStub	Dev	014	ReExpenseStub	Creating RecurringExpensePersistenceStub file	Alanna	
Dev#015_UpdatingUI	Dev	015	UpdatingUI	Updating XML files, refining UI elements of our project	3	Alanna
Dev#016_UpdateFragments	Dev	016	UpdateFragments	Update Home, Analytics, Tracking dashboards, & creating ProfileFragment	Alanna	
Dev#017_OTIncomeServices	Dev	017	OTIncomeServices	Creating the one time income services in the logic layer	Junior	
Dev#018_FixDashboards	Dev	018	FixDashboards	Fix existing dashboards, create new dashboard for add income add add expense	1.5	Alanna
Dev#019_OTExpanse	Dev	019	OTExpense	OTExpense	Prit	
Dev#020_ReviewServices	Dev	020	ReviewServices	Reviewing code in logic layer related to services (users, income, expense etc.)	Alanna	
Dev#021_loginChanges	Dev	021	loginChanges		Prit	
Dev#022_SetUpTracking	Dev	022	SetUpTracking	Base setup for implementing tracking services (logging income, and expense)	Alanna	
Dev#023_PresentationReview	Dev	023	PresentationReview	Reviewing Code in the presentation package	Alanna	
Dev#024_BusinessReview	Dev	024	BusinessReview	adding comments and such	Max	
Dev#025_ObjectsReview	Dev	025	ObjectsReview	commenting the DSO's	Max	
Dev#026_HomeReview	Dev	026	HomeReview	Reviewing home fragment	0.5	Alanna
Dev#027_CLI	Dev	027	CLI	adding a command line interface for testing	max	
Dev#028_DBStart	Dev	028	DBStar	Starting initial DB stuff	max	
Dev#029_RefactorPres	Dev	029	RefactorPres	refactoring presentation layer :	Max	
Dev#030_entryRefactor	Dev	030	entryRefactor	deleting refactoring stuff	Max	
Dev#031_ProfileFragment	Dev	031	ProfileFragment	completing the Profile fragment try to add get data from backend and add those on profile	Prit	
Dev#032_DbEntryInterface	Dev	032	DbEntryInterface	Adding DBInterface	prit	
Dev#033_HSQLDB	Dev	033	HSQLDB	switching DB for hopefully the last time ☺	2	Max
Dev#034_UIUpdates	Dev	034	UIUpdates	Updating UI items previously lost. Ex: deleted dead buttons before last submission.	4	Alanna
Dev#035_EntryPersistenceStub	Dev	035	EntryPersistenceStub	Stub for entrypersistence class	prit	
Dev#036_Userinvalidator	Dev	036	Userinvalidator	making proper messages	3	Max
Dev#037_EntrySQL	Dev	037	EntrySQL	making the entry sql stuff and interface implmentation	3	Max
Dev#038_userException	Dev	038	userException	making them like juniors	3	Max
Dev#039_AddIncomeFragment	Dev	039	AddIncomeFragment1	adding the fragment for income	prit	
Dev#040_userEntry	Dev	040	UserEntry	adding entry ID's to User and methods for it	Max	
Dev#041_EntryService	Dev	041	EntryService	Adding the Entry Service class, supports actions for adding and collecting entries	3	Alanna
Dev#042_EntryDB	Dev	042	EntryDB	added functions for EntryService in entryDB will refactor tmrw	2	Max
Dev#043_PresentationRefactor	Dev	043	PresentationRefactor	changing launch and main to have a better order	2	max
Dev#044_EntryService	Dev	044	EntryService	Improving Entry Service class, define and create entry object, implementing edit and delete	2	Alanna
Dev#045_AddIncomeUI	Dev	045	AddIncomeUI	Improving UI clarity by reorganizing fields and refining layout, including button adjustm	2.5	Alanna
Dev#046_addIncomeFunction	Dev	046	addIncomeFunction	added the functionality to the UI	2	max
Dev#047_inputErrorHandler	Dev	047	inputErrorHandler	add input error handling for the entry user unput ui	2	max
Dev#048_RefineUI	Dev	048	RefineUI	Refining UI, set up placeholder fragments	1	Alanna
Dev#049_baseEntryFagment	Dev	049	baseEntryFagment	adding oops in add entry class	prit	
Dev#050_IncomeHistoryNav	Dev	050	IncomeHistoryNav	Setting up income history fragment and the navigation to the income history screen	Prit	
Dev#051_baseHistoryFragment	Dev	051	baseHistoryFragment	parent of all history fragments	Prit	
Dev#052_displayDataInHistFrag	Dev	052	displayDataInHistFrag	displaying the data on history fragments	prit	
Dev#053_HistorySnapshot	Dev	053	HistorySnapshot	Display snapshot of few most recent histories on tracking fragment page	Prit	
Dev#054_IncomeHistoryUpdate	Dev	054	IncomeHistoryUpdate	Updating the income history fragment and UI	2	Alanna
Dev#055_EntryDateRefactor	Dev	055	EntryDateRefactor	refactoring entryService, database, getting proper dates and shit	1	Max
Dev#056_editIncomeEntry	Dev	056	editIncomeEntry	added logic+UI for income entry to edit	0.5	Prit
Dev#057_deleteIncome	Dev	057	deleteIncome	user can delete income that he inserted before	0.5	Prit
Dev#058_EditDeleteUpdates	Dev	058	EditDeleteUpdates	Updating edit and delete fragments and xmls	0.5	Alanna
Dev#059_implementEditEntry	Dev	059	implementEditEntry	made edit entry work	0.5	Max
Dev#060_EditDeleteUI	Dev	060	EditDeleteUI	Updating the edit an entry page UI for continuity and tablet width support	0.5	Alanna
Dev#061_expenseSnapshot	Dev	061	expenseSnapshot	Shows recent expense on tracking page	Prit	
Dev#062_refreshWhenChange	Dev	062	refreshWhenChange	refresh screen when changes occur	Prit	
Dev#063_UIAdvice	Dev	063	UIAdvice	Implementing UI changes as suggested by Lauren	1	Alanna
Dev#064_AddEntry	Dev	064	AddEntry	remove add-income/Expense and add AddEntry	0.5	prit
Dev#065_EditProfileUpdates	Dev	065	EditProfileUpdates	Fixing Edit Profile	1	Alanna
Dev#066_editAccountFunction	Dev	066	editAccountFunction	adding function to edit account	1	max
Dev#067_deleteAccount	Dev	067	deleteAccount	adding deleting account	0.5	max
Dev#068_finalRefactor	Dev	068	finalRefactor	doing a final regaccot	4	max
Dev#069_finalRefactor2	Dev	069	finalRefactor2	doing a final regaccot 2	max	
Dev#070_finalRefactor3	Dev	070	finalRefactor3	doing a final regaccot 2	prit

COMP 3350 - Wealth Wise App Project

Team members: Alanna Morris, Max Waldner, Junior de Leon, Prit Italiya, Mahas Mohamed Mifthah

Type: Tech Debt

Purpose: Used for refactoring and tech debt related tasks.

Full Branch Name	Type	Number	Task Name	Description	Time (hr)	Contributor
Example: TechDebt#001_SRPServicesFix	TechDebt	001	SRPServicesFix	Fixing the SRP violation found in the services logic layer		Alanna
TechDebt#001_EntryClass	TechDebt	001	EntryClass	fixing the entry class according to comments	0.5	Prit
TechDebt#002_ObjectFixes	TechDebt	002	ObjectFixes	Focusing on fixing object structure according to refactor feedback		Max
TechDebt#003_ValidatorClassFix	TechDebt	003	ValidatorClassFix	trying to add validator class to validate input	0.5	Prit
TechDebt#004_performSignUp	TechDebt	004	performSignUp	rename method which was same as performSignUp	0.1	Prit
TechDebt#005_NoReturnInVoid	TechDebt	005	NoReturnInVoids	removed return in void function	0.1	Prit
TechDebt#006_DupFromUserService	TechDebt	006	DupFromUserService	duplication removed from user service	0.1	Prit
TechDebt#007_IfElseRemoved	TechDebt	007	IfElseRemoved	Ifelse removed from login and signup	0.2	Prit
TechDebt#008_noValidationInUser	TechDebt	008	noValidationInUser	user validation from user.java removed should be done through userservice	0.1	Prit
TechDebt#009_EntryRevisions	TechDebt	009	EntryRevisions	Revisions to Entry class and all associated files in logic layer (according to lauren's feedback)		Junior
TechDebt#010_EntryRebase	TechDebt	010	EntryRebase	EntryRevision rebase		Junior
TechDebt#011_functionDelete	TechDebt	011	functionDelete	cleaning upo funciton		Max
TechDebt#012_privatePublic	TechDebt	012	privatePublic	24. some private and some not?	0.2	Prit
TechDebt#013_TempBtnDelete	TechDebt	013	TempBtnDelete	Removing dead buttons that while be implemented next iteration, refactoring files	1	Alanna
